

Question Content	Option 1	Option 2	Option 3	Option 4
Manifold is ?	Subsurface equipment	Surface	Both A and B	None of these
Which of the following is not a part of oil well production system?	Tubing	Christmas Tree	choke	drillpipe
Wells are called as HPHT wells if depth of the well is greater than or equal to	5000	10000	25000	1000
Drillship is used	onshore	offshore	lakeside	None of these
Steel grade of tubing is designated to H-80. 80 refers to	Maximum Yields Stress	Minimum Yield Stress	Burst Pressure	Collapse Pressure
Packers have four key features	slip	cone	packing element	All of these
The flow is called Absolute Open flow is when Flowing bottom hole pressure in atm is ?	1	1000	10	100
Out of following options, which skin factor reflects stimulation	-8	6	0	10
IPR for gas resercoir is a	line	curve	first straight line then curve	None of these
Predict nature of IPR Curve for a given data of reservoir: Pr= 5500 psi, Pb is= 3500 psi	line	curve	first straight line then curve	None of these
The undersaturated reservoir contains	Single Phase	multiphase	two phase	None of these single phase oil flow
Amount of gas highest in	Bubble flow	Slug Flow	Mist flow	
Which of the following completion allows operators to selectively produce or comingle reservoir fluid from different zones into one well?	Open hole completion	Cased hole completion	Liner completion	Multiple zone completio n
Excessive pressure drawdown may result in	More water cut	More Oil cut	More gas cut	All of these

Which explosives are used to initiate or detonate the explosive sequence?

Gravel pack mechanism

Expandable sand screen

Injection of plastic resin in the formation

All of these

Tubing strings are designed considering tension, collapse, and burst loads under various well operating conditions to prevent its mechanical failure and deformation.

This statement is

SSSV

Production Packers

Landing Nipple

None of these
